Konti Company Profile

Root Issue	Conventional construction often relies on materials like unsustainably harvested wood and concrete as well as fossil fuel-intensive processes. These practices can be costly and contribute to unhealthy environments throughout our planet.
Mission	Empowering communities through sustainable solutions.
Vision	Building a future where sustainability is at the heart of every living space.
Unique Selling Point	Sustainable Expertise, Exceptional Results. Konti delivers exceptional and sustainable spaces that reflect your unique vision. Our team of LEED-accredited professionals combines innovative design with eco-conscious construction practices to create buildings that are not only beautiful and functional but also minimize their environmental impact and aid in regenerating their natural surroundings. We specialize in custom designs that perfectly suit your needs and preferences, ensuring a space that reflects your style and values. Choose Konti for a building that is good for you and the planet.

Our Beginnings

Konti emerged from a post-hurricane reconstruction effort in Puerto Rico. The founder, working for FEMA, witnessed the widespread lack of access to proper housing. The high cost of housing compared to the median income in Puerto Rico highlighted the need for affordable solutions. Konti was born out of this challenge, to create sustainable, resilient, and cost-effective structures for the majority of the population.

Benefits

Konti Company Benefits:

Sustainable Expertise: LEED-accredited designers, architects, engineers and environmental engineers.

Modular Design: Faster assembly, reduced construction time, flexible designs for various sites. Lowering emission with less transportation needs.

Fast Track Construction: Streamlined process allows for simultaneous work on different phases, cutting project timelines.

Factory Efficiency: Standardized modules built in a controlled setting ensure exceptional efficiency and quality control.

Code-Compliant Designs: Konti ensures every design adheres to relevant building codes for safety and well-being.

ADA Accessibility: Konti offers inclusive designs that are accessible to everyone.

Your Vision, Our Expertise: Konti customizes spaces to reflect your unique vision and values.

Shipping Container Material Benefits:

Unmatched Strength: Withstand up to 400,000 lbs., allowing for multi-story buildings and superior resistance to natural disasters.

Weatherproof Protection: Built to endure harsh conditions, shielding your space from the elements for long-lasting durability.

Lead-Free Safety: Konti uses lead-free containers to eliminate potential health concerns.

Wind Resistant: Our structural engineers ensure their designs withstand 180 mph of sustained wind with gusts of 200 mph gusts as per the Puerto Rico Building Code requirements.

Fire Resistant: Your home or business will be built of one of the most fire resistant materials : Steel.

Water Resistant: Unlike concrete, steel is not a porous material. With some painting maintenance you can ensure your roof will not leak. Instead let us redirect this water toward a rainwater collection system.

Bug Resistant: Your home or business will be built of one of the strongest materials on earth : Steel. Bugs cannot eat steel, ensuring that the main structure of your home will always be safe from pests.

Mold Resistant: Mold cannot penetrate steel, ensuring that the main structure of your home will always be safe from mold and rot.
